

# Banner notifications

## Getting started

This article describes **Banners / list** tab in the admin panel, which will allow users to create header and side notifications on the website. Notifications work like CMS blocks using HTML + CSS code, and can be activated on specific altshops.

There can be more than one header banner **(1)** visible at the same time. When the top banner is closed by the client, it will be not visible to the customer for configured in the [System / Settings](#) amount of days.

Only one side banner **(2)** can be visible, and it is determined by their sort order.

## Configuring the banners

Top and side banners can be created and managed in the **CMS > Banners / list**

info2.svg **Remember**

Every created banner needs to be activated in the desired altshop. More about activating banners in the altshops can be found in the [Banners / list - browsing and managing banners in altshop module](#) article.

**Banners list**

*Visualization of the Banners / list tab*

In the **Banner / list** tab, it is possible to select the **Show X entries (1)** field to set the number of banners, displayed on one page (min 10 / max 100).

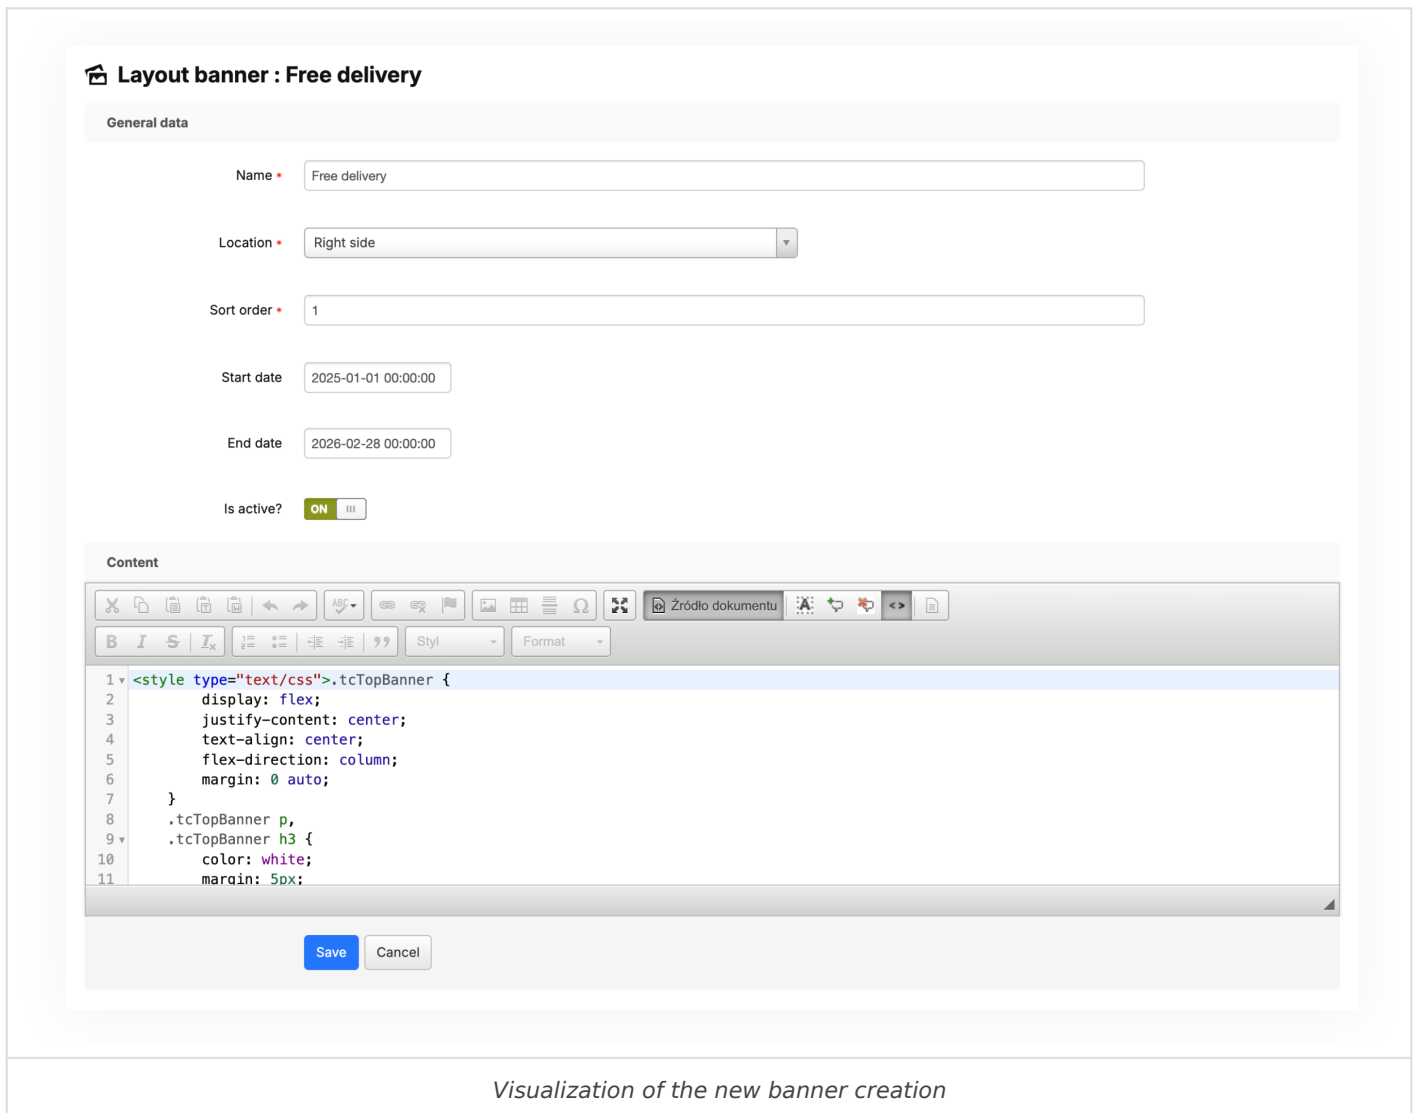

In this tab we can also find columns **(2)**, that can be sorted, with basic information regarding the banners:

- **ID** - Internal ID of the banner.
- **Location** - Top or Side location.
- **Name** - Internal name.
- **Start and End date** - Range of dates when the banner should be visible.
- **Is Active?** - Status if the banner is currently active.
- **Sort order** - Sort order of the banner.
- **Update time** - Last update time done by the user.
- **Actions** - Three action buttons that allows to
  - **Edit** selected banner. Editing is the same action as **Add**, but with already existing element. More about it can be read below.
  - **Duplicate** selected banner. Duplicate creates exactly the same banner, but with a (x) at the end of the name (where X is a number).
  - **Delete** selected banner.

In order to create new banner, we need to click on the **Add (3)** button

It is possible to search for a desired banner by their name using the search box **(4)**, change the pages when the number of banners is by default bigger than 10 **(5)**, and see how many banners

are currently visible on the page out of them all **(6)**.

**Layout banner : Free delivery**

General data

Name \* Free delivery

Location \* Right side

Sort order \* 1

Start date 2025-01-01 00:00:00

End date 2026-02-28 00:00:00

Is active? **ON**

Content

```
1 <style type="text/css">.tcTopBanner {
2   display: flex;
3   justify-content: center;
4   text-align: center;
5   flex-direction: column;
6   margin: 0 auto;
7 }
8 .tcTopBanner p,
9 .tcTopBanner h3 {
10  color: white;
11  margin: 5px;
```

Save Cancel

*Visualization of the new banner creation*

When creating new banner, we can specify:

- **Name** - Internal name.
- **Location** - Top or Side location.
- **Sort order** - Sort order of the banner.
- **Start and End date** - Range of dates when the banner should be visible.
- **Is Active?** - Status if the banner is currently active.

In the content tab, we need to type HTML code in order for it to be visible on the website for the customer.

Example code for Top banner:

```
<div style="width: 100%">
<p style="text-align:center;">Connectez-vous ou créez votre compte pour profiter de vos <strong>
</div>
```

Example code for side banner:

```
<style type="text/css">.side-banner-content {
  height: 100%;
  color: #fff;
  display: flex;
  justify-content: center;
  align-items: center;
}
</style>
<div class="side-banner-content">
<p style="color: #fff;">Connectez-vous ou créez votre<br />
compte pour profiter de vos<br />
<strong>avantages exclusifs</strong></p>
</div>
```

With the correctly filled necessary fields and code, we can save the banner.

---
