

Simplified mobile top menu

Screenshot_2020-04-29_at_19.1 Getting started

This article describes simplified mobile top menu functionality, that shows top menu categories in the mobile view **(1)**. This functionality allows partners to decide, if they prefer to use top menu for mobile version of the website.

info2.svg **Remember**

The content visible in the top menu is configured in CMS > Top menu / list. More information regarding top menu can be found in **[UNDER CONSTRUCTION]** article.

When turned on, simplified mobile top menu will be visible at all times on the mobile version of the website. It can be turned on in the **Admin panel > System > System / Settings > Built-in functions > Top menu.**

In **Top menu** tab we can find **Simplified mobile menu (1)** switch, which will turn on the functionality when it's turned on.

Customer perspective

With the functionality turned off, customer will see the old top menu, where he needs to click on the menu in the top right corner in order to see available categories on the website
